CHAIR

DPIIT-IPR Chair The DPIIT IPR-CHAIR has been established at Chanakya National Law University, in 2023, under the SPRHA scheme of the Department for Promotion of Industry and Internal Trade (DPIIT), Ministry of Commerce and Industry, Government of India. The IPR Chair aims to promote IPR Culture and contribute to IPR research and knowledge. The DPIIT IPR-Chair at Chanakya National Law University, looks forward to collaborating with academics, researchers, and industry to promote effective utilization of IPRs. Prof. (Dr.) S.C. Roy, Professor of Law, Chanakya National Law University is the DPIIT IPR-Chair Professor at Chanakya National Law University, Patna.

About CNLU, Patna: Chanakya National Law University (CNLU) is a National Law University in Patna, established in 2006 by the Government of Bihar (Bihar Act 24 of 2006) as a public university dedicated to the field of legal education. The Chief Justice of Patna High Court is the ex-officio Chancellor of the university. The CNLU is running five years B.A.LL.B., BBA. LL.B., LL.M., and Doctoral programs. This is one of the Premier Academic and Research University in India.

MESSAGE FROM THE CHAIR

DPIIT - IPR CHAIR
CHANAKYA NATIONAL LAW UNIVERSITY

EDITORIAL NEWSLETTER

As we enter a time when innovation and intellectual property (IP) are at the heart of global progress, it's clear that universities must play a central role in shaping the future. At the DPIIT IPR Chair of our Chanakya National Law University, we are deeply committed to create a vibrant and sustainable IP ecosystem. Our mission is to serve and support university researchers in the pursuit of IP creation, protection and commercialization.

IP isn't just about safeguarding an idea it's about fuelling a mindset of innovation that drives collaboration, entrepreneurship, and growth. Universities have always been spaces where knowledge and invention thrive, and with technology advancing at lightning speed, our role in supporting these innovations is more important than ever. Through the DPIIT IPR Chair, we are working to connect the dots between intellectual property law and real-world innovation. Whether it's patents, trademarks, copyrights, geographical indications or trade secrets, we're equipping our community with the knowledge and tools to protect their work and take it to new heights.

This newsletter highlights some of the exciting initiatives we've undertaken in the past, from workshops and seminars that delve into the nuances of IPR, to collaborative projects that demonstrate how IP can be leveraged for societal impact.

The main area of our research was PMBJP, where we examined the impact of JANAUSHADHI on pharmaceutical sector and the role of affordable generic medicines in improving public health. The future of trademarks is another important focus, as these marks play a key role in safeguarding business identity and ensuring consumer trust. As global competition intensifies, trademarks will become increasingly vital to protect brand value and foster business growth.

Our work on commercialising medicinal plants in Bihar is also crucial. By identifying and using the potential of local plants, we aim to create an ecosystem that supports both entrepreneurship and community health. As part of this effort, we have initiated awareness programmes to educate local farmers and entrepreneurs about the commercial potential of these plants and the importance of IP protection.

Furthermore, we are dedicated to empowering women through intellectual property rights, providing women entrepreneurs with the knowledge and tools to expand their businesses. Our research also explores how IP can contribute to human capital development, allowing individuals to capitalise on their innovations.

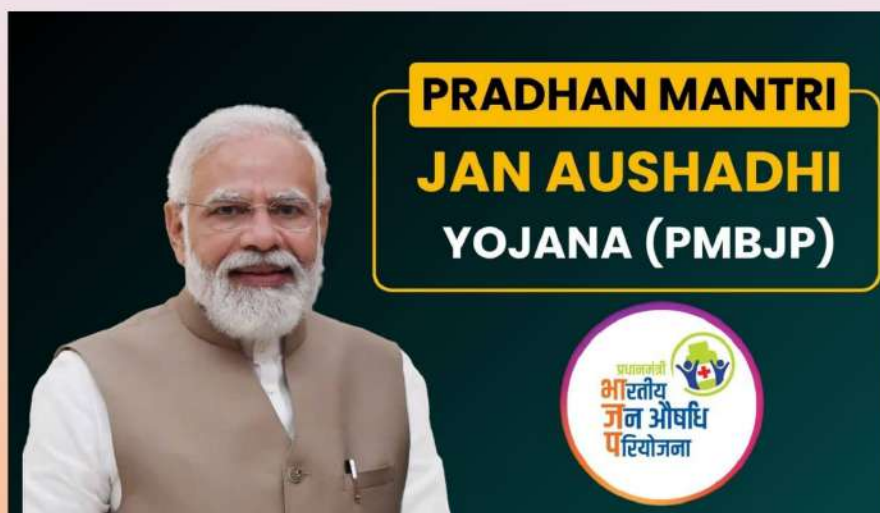

Looking ahead to a Viksit Bharat by 2047, we envision a future where India stands as a global hub of innovation, driven by strong intellectual infrastructure. The efforts of the DPIIT IPR Chair of Chanakya National Law University will continue to contribute to this vision, promoting a thriving IP ecosystem that supports both economic prosperity and societal well-being.

As we look to the future, our focus remains on building an inclusive environment where creativity can thrive, and intellectual property can be a force for good. By staying in tune with both national and international trends, we are constantly working to deepen our understanding of IP not just as a legal framework but as a powerful engine for business, entrepreneurship, and economic growth.

We invite you to dive into this issue and explore the many exciting opportunities on the horizon. Together, let's continue building a future where intellectual property is not just a tool for protection but a catalyst for change and progress in a knowledge-driven world.

Prof. Dr. SUBHASH C ROY,
Director (CIRF-IN-IPHD)
DPIIT-IPR Chair Professor
Chanakya National Law University

KEY NOTE ADDRESSES BY IPR CHAIR PROFESSOR

Artificial Intelligence (AI) and Intellectual Property Rights (IPR) are intersecting fields that raise critical legal and ethical concerns. As AI technologies evolve, they generate new forms of creative work, inventions, and innovations. The challenge lies in determining who owns the intellectual property created by AI: the creator of the AI, the user, or the AI itself? Traditional IP laws struggle to accommodate AI-driven creations. For example, patents for AI-generated inventions complicate the ownership issue, while copyright laws must address works autonomously produced by AI. As AI continues to shape industries, it is essential for policymakers to update IPR frameworks to balance the protection of innovation with encouraging creativity and technological advancement. This will ensure fair compensation and foster a dynamic intellectual property environment.

DPIIT-IPR Chair Professor**

Women face significant barriers in the field of intellectual property (IP), with underrepresentation in patent filings and limited access to resources. Cultural norms, financial constraints, and gender biases often hinder women from securing protection for their innovations. As a result, their contributions to science, technology, and business remain undervalued. Initiatives by organizations like WIPO aim to address this gender gap by providing women with resources, education, and networking opportunities. Empowering women in intellectual property rights is crucial to fostering a more equitable innovation ecosystem, ensuring that their creative contributions are protected, recognized, and celebrated globally.

NATIONAL SEMINAR ON
"INTELLECTUAL PROPERTY RIGHTS AND HUMAN CAPITAL DEVELOPMENT"

10th July, 2023

DPIIT-IPR CHAIR
Ministry of Commerce and Industry
Government of India
New Delhi.

PATRON

Hon'ble Justice Mridula Mishra
Former-Vice-Chancellor
CNLU

CO-PATRON:

SRI M.P. SRIVASTAVA
Former-Registrar

ORGANISER:

Prof. (Dr.) S.C. Roy
Professor of Law
DPIIT-IPR Chair Professor
CNLU

Chanakya National Law University Patna celebrated the **INAUGURAL CEREMONY** of the DPIIT-IPR Chair and organized a one-day seminar on **"INTELLECTUAL PROPERTY RIGHTS AND HUMAN CAPITAL DEVELOPMENT."**

The dignitaries on the dais included Mr. A.K. Jain (Former Law Secretary, Government of Bihar), Dr. B.P. Singh Raman (Former Deputy Director, Indian Patent Office), Prof. Dr. Raman Mittal (University of Delhi), and other distinguished resource persons.

The seminar focused on one of the objectives of the National IPR Policy 2016, which talks about strengthening and expanding human resources. The national seminar was followed by five parallel technical sessions, where more than a hundred participants presented papers through online and offline modes. The valedictory ceremony was graced by the Vice Chancellor, Hon'ble Justice Mridula Mishra, who also inaugurated the IPR Chair. Human intellect is the creator of intellectual property, with the investment of labor, skill, and judgment, generating rights in the property, known as intellectual property rights (IPR). These are exclusive rights granted to the creators for their creations. Intellectual property rights include patents, copyrights, trademarks, industrial designs, geographical indications, trade secrets, layout designs for integrated circuits, traditional knowledge, plant variety and farmers' rights, biotechnology, and agriculture, among others. It is a legal concept that refers to creations of the mind for which exclusive rights are recognized. The policy recognizes the abundance of creative and innovative energies flowing in India and the need to tap into and channel these energies toward a better and brighter future for all. It views IPRs holistically, taking into account all disciplines, and aims to create and exploit synergies between all forms of intellectual property (IP), concerned statutes, and agencies. It establishes an institutional mechanism for implementation, monitoring, and review, and aims to incorporate and adapt global best practices to the Indian scenario.

COMMERCIALISATION OF MEDICINAL PLANTS IN THE STATE OF BIHAR

Date:11th November,2023(Saturday)

ORGANISER

Prof. (Dr.) S.C. Roy
Professor of Law
DPIIT-IPR Chair
Professor
CNLU

The DPIIT-IPR Chair organized a one-day online awareness program on the **Commercialization of Medicinal Plants in the State of Bihar**. Over 120 participants attended the session, with a panel that included Dr. M.P. Mandal, Prof. Vidyanath Jha, and Prof. Chandra Bhushan Trivedi. During the discussion, one of the speakers highlighted the increasing importance of the Aloe Vera plant. Throughout the session, the speakers motivated the listeners to take initiative in preserving and protecting medicinal plants from extinction by curbing their exploitation and misuse.

The commercialization of medicinal plants in Bihar offers great potential due to its diverse flora and rich heritage of traditional medicine. The state is home to numerous medicinal plants like neem, tulsi, and ashwagandha, which have high demand in the global herbal market. By focusing on sustainable cultivation, Bihar can boost local agricultural practices and provide farmers with alternative, profitable income sources.

To unlock this potential, it is essential to establish processing units and create value-added products such as herbal oils, teas, and cosmetics. Government policies and incentives that encourage organic farming, research, and development can significantly improve productivity and quality. Additionally, enhancing infrastructure, including storage and transportation facilities, will help in the efficient distribution of these products. Collaboration between the government, private sectors, and research institutions can help develop new markets and expand the export of medicinal plant-based products. The commercialization of these plants can transform Bihar into a leading hub for herbal medicine, benefiting local communities and boosting the state's economy.

DPIIT- IPR CHAIR CNLU
Organizing Online Symposium on

Valuation of Intellectual Property Assets
(Copyright, Patent, Trademarks, Design & Trade Secrets) In Business and Industry

27th NOVEMBER, 2023

EMINENT SPEAKERS

Dr. B.P. Singh
Former Chairman In-charge & Technical Member (IPAB) New Delhi

Prof. Tabrez Ahmed
Professor of Law MANUU, Hyderabad

Prof. (Dr.) Sanjay Srivastava
Professor of Fashion & Design NIFT, Patna

Dr. Naveen Gopal
Guest Faculty (IPR) Cochin Univ. of Science & Technology, Cochin

Mr. Prateek Srivastava
Patent Attorney Gwalior

Realizing the economic value of IP in today's globalizing knowledge based economy the IPR Chair at CNLU organized One Day Online Symposium on **Valuation of Intellectual Property Assets (Copyright, Patent, Trademarks, Design & Trade Secrets) In Business and Industry**. The session in at discussing one of the grey areas of IPR and through the discussions laid down the need to have uniform methodology for valuation of IPR.

Valuation of intellectual property (IP) assets—such as copyrights, patents, trademarks, designs, and trade secrets—plays a crucial role in business and industry. These intangible assets can significantly impact a company's market value, strategic decisions, and competitive advantage. Copyrights protect creative works, patents cover innovative inventions, trademarks safeguard brand identity, designs enhance aesthetic appeal, and trade secrets maintain confidential business information.

IP valuation helps in mergers, acquisitions, licensing, and litigation, providing companies with insights into their IP's economic worth. Accurate IP valuation can guide investment decisions, enhance revenue generation, and foster innovation. In industries like technology and entertainment, where IP is central to business models, understanding its value is vital for long-term success and protecting business interests.

SRMIST, Chennai

Mr. Abhishek Kumar
Assistant Professor
Chanakya National
Law University, Patna

Mr. Prashant Kumar Pushkar
Research Scholar
Chanakya National
Law University,
Patna

The purpose of this program was to highlight the key role that G.I. (Geographical Indication) and Plant Variety Protection play in encouraging plant breeding in both the public and private sectors, and in delivering high-quality varieties to farmers and growers. The objective of the session was to educate and inform people about job opportunities through G.I. and Plant Breeder's Rights protection.

Bihar, with its rich cultural heritage and diverse agricultural practices, offers numerous opportunities in the fields of Traditional Knowledge, Geographical Indications (GIs), and Plant Breeders' Rights (PBRs). Traditional knowledge in the state is deeply rooted in local customs, crafts, and agriculture, presenting a significant potential for commercialization, especially in sectors like handicrafts, Ayurveda, and organic farming. GIs, which protect products tied to a specific region, can help in promoting Bihar's indigenous products such as Madhubani art, Sikki grass, and Shahi litchi. These products, when registered under GIs, not only safeguard the local heritage but also create business avenues through national and international markets

Plant Breeders' Rights, by encouraging innovation in agricultural practices and crop breeding, can boost Bihar's agricultural productivity. These legal rights provide breeders with exclusive control over new plant varieties, offering incentives for research and investment. Together, these sectors can transform Bihar into a hub for sustainable development, providing employment and fostering regional economic growth.

CNLU, Patna

Resource Person

Dr. ALTHAF MARSOOF
Assistant Professor
Business Law at the
College of Business,
Nanyang Technological
University (NTU),
Singapore

The core discussion revolved around A.I. and trademarks. The speaker highlighted the impact of A.I. in the context of trademark laws. During the discussion, the speaker talked about e-commerce and the ease of doing business through A.I., as well as the challenges faced by brand owners. The speaker concluded the lecture with an interesting question: **"Can brands get QR codes registered as trademarks?"**

A trademark is a distinctive sign, symbol, logo, word, or combination used by a business to differentiate its products or services from those of others. It serves as an essential tool for protecting a company's brand identity, reputation, and goodwill. Trademarks help consumers identify the source of a product, ensuring they are purchasing from a trusted and familiar brand. The registration of a trademark provides exclusive legal rights, enabling businesses to prevent unauthorized use or infringement of their intellectual property.

Additionally, with the growing focus on sustainability and corporate social responsibility, trademarks may evolve to represent values beyond products, such as eco-friendly practices and ethical sourcing. In the future, trademarks will not only protect business identity but also serve as a reflection of brand values and consumer trust.

The purpose of this program was to sensitize, inform, and motivate the audience about empowering intellectual properties (IPs) to achieve the "Viksit Bharat" goal. The session discussed the role of IP in achieving a "Viksit Bharat" by 2047. Through insightful sessions, IPs act as a yardstick in making India more innovative

Prof. (Dr.) S.C. Roy
Professor of Law
DPIIT-IPR Chair Professor
CNLU

By encouraging intellectual property rights (IPR) awareness, supporting startups and entrepreneurs, and enhancing access to patents and copyrights, India can unlock the potential of its diverse workforce. Promoting innovation in agriculture, manufacturing, and digital sectors will be key to driving economic progress. As India moves towards 2047, creating a dynamic intellectual infrastructure will empower individuals, businesses, and institutions to contribute to national development. This will ultimately help India emerge as a global leader in technology, culture, and sustainable growth.
