

# Chanakya National Law University, Patna

**CENTRE FOR INNOVATION RESEARCH AND FACILITATION In**

**INTELLECTUAL PROPERTY FOR HUMANUTY AND DEVELOPMENT**

**NATIONAL RESEARCH WORKSHOP (online) on**

**‘OUR COMMON CONCERN IN TEACHING AND RESEARCH IN LAW’**

**[CCTRL-21]**

**16<sup>th</sup> March 2021 (2: PM-6:00PM)**

Teaching and Research are two shapes of the same coin of Education. It is inalienable function of the educational institutions, as the teachers have to research for imparting lesson to students. The innovation in teaching is a routine work of a teacher. It makes the lesson impressive, palatable and beneficial. Further project research is assigned to students is a part of curriculum. Apart teaching assignment to teachers, they have to guide research scholars for Ph.D. Degree. Further the institutional projects for policy research are also the part of profession. In this way the faculty has to have busy in research work as a whole. Hence the methodology of research is equally significant which requires to be inculcated. As it helps in reaching the desired objectives-KNOWLEDGE TO THE FACULTY, RESEARCHERS, STUDENTS, SOCIETY, INDUSTRY, POLICYMAKERS etc. Hence the quality research is a subject of concern. How to compete with foreign Universities in research. Can the ETHICS AND INTEGRITY REGULATIONS ALONE produce QUALITY RESEARCH? Should there be a separate Body to monitor Doctoral and Project research for universities? The National Research workshop wants to discuss the present scenario in India for appropriate solution. Since the socio-legal –politico issues are getting complex in governance, everyone is seeking solution to all problems in law. The research in the University is merely theoretical. IT IMPARTS MERE DEGREE. Why the research is far away from socio-industry oriented? Why not there should be full time research program so that empirical survey and laboratory work can be done? Can the Law University remain indifferent to national and global demands and desires of the society, industry, business and educational institutions? Can mono-disciplinary research fulfil the needs of society and industries? What are the hurdles in interdisciplinary/multidisciplinary/cross-disciplinary research? What the way is out is our common concern. Whether the PPFIP (Protection and Utilisation of Public funded Intellectual Property Bill 2008) is not the urgent need of the hour?

On this Occasion (The Anniversary Day of the Centre) the **E-Journal JAIRIPA** and **IP BULLETIN** of the Centre (CIRF in IPHD) shall be launched.

Prof. Dr .Subhash C Roy

Director (CUIRF in IPHD)
